Professional Experience

- **Flutter Developer :**
  TATOS Technologies Pvt Ltd (2022 may - Current)
  As a Flutter Developer, I've created complex mobile apps using Flutter, integrated third-party libraries and APIs, and used Git for version control. These experiences have given me a strong understanding of how to develop high-quality mobile apps using Flutter.

Projects

- **Ek Ka Josh**
  Ek Ka Josh is an Indian online crowdfunding platform where any organization across the country can raise funds for any kind of cause. It is completely built on bloc architecture and includes payment deep linking, as well as several other features

- **Abhimani**
  Ahimani is a WhatsApp sticker application with a dashboard built in Flutter web, where users can upload stickers. The user app allows for exporting stickers to WhatsApp on iOS and Android. This app also has Firebase messaging, deep linking, and several other features. It is completely built on bloc architecture

- **Solo Luxury**
  Solo Luxury is a set of 5 eCommerce applications built using the Flutter framework. All of them have the same features but different UI designs. I have updated the UI and some test cases on all the applications. It is completely built on GetX architecture

- **Linqhaul**
  Linqhaul is a truck logistics application built entirely on the Liverpod architecture. I worked on this project, which involved handling complex graphs and data

- **Koachme**
  Koachme is a skill learning application. I have updated it to use Flutter null safety, chat SDK and added some features, such as the ability to reschedule courses

- **pryzcryb**
  Pryzcryb is an online doctor consultation app. I have updated to null safety

Personal Project

- **scrollable_tab_view Package**
    This Flutter package provides a scrollable tab bar widget that allows you to display resizable tabs

    (github.com)

- **Weather App**
    This is a simple weather app built with Flutter that displays the current weather for a given location. The app uses the weatherapi.com API to fetch the weather data and displays it in a user-friendly interface

    (github.com)

- **E Commerce Seller App (flutter web app)**
    Flutter e-commerce Seller Web app Using bloc pattern. made with firebase which provides features like Authentication and Realtime Database

    (github.com)

- **Dictionary application**
    A simple dictionary application that uses a bloc pattern. Meaning is taken from the dictionary API

    (Live Link)   (github.com)

- **E commerce application UI**
    Flutter e-commerce application using bloc pattern. This design has service requests and a store

    (github.com)

- **Flutter database connection**
    This application just fetches and update data from The MySQL database using REST API (with node.js)

    (github.com)

Declaration

I hereby declare that the above – mentioned particulars are true to the best of my knowledge and belief.
